

HD7

Hand Held Metal Detector

General Description

The HD7 is a hand held metal detector for security and counter- IED operations such as target confirmation and tactical personnel area search as well as person search and similar screening applications. It is designed to withstand extended periods of use in harsh environments while providing a high level of sensitivity.

Primarily designed for use by the military and police forces for:

- Person Search
- Counter improvised Explosive Device (CIED) operations
- Target Confirmation
- Safe Route

The HD7, is rugged and simple to use, the detector is weather resistant and is manufactured to meet relevant UK Defence Standards and carries the CE mark.

The HD7 is in service with the UK Armed Forces & Nato

Countries. The HD7 is powered by a standard 9 volt PP3 Battery giving approximately 40 hours use.

The HD7 is available in tan or black colours with a MOLLE Compatible metal clip. An optional lanyard to attach to belts, Webbing and body armour is available.

Target Alarm: Audio, Visual, Vibrate
