

ABL HOTROD DISRUPTOR

The Hotrod Disruptor is an established equipment for disruption of improvised Explosive Devices (IED's) that are contained in large or well protected packages such as large parcels, suitcases etc.

The Hotrod has been in active service for over 25 years with many bomb disposal teams worldwide and has been proven to be an extremely reliable method of disruption.

Hotrod may be deployed using an optional lightweight stand or by mounting to a Remotely Operated Vehicle (ROV).

Preparation of the Disruptor is straightforward and quick to achieve and may be carried out remotely from the target to enhance operator safety.

Hotrod is constructed from non corroding stainless steel parts. Prior to release each disruptor is subjected to an over pressure proof test and flaw detection.

The Hotrod is supplied as a complete kit (less stand) in a valise style holdall which includes pockets to secure all parts.

ABL HOTROD DISRUPTOR

AMMUNITION

The Hotrod is operated by a bespoke cartridge. Each batch of cartridges are ballistically tested to ensure correct and consistent performance.

The cartridges are supplied in multiples of 90 packaged within an M2A1 container complete with all internal furniture and all required consumable parts.

Cartridge NSN: 1385-99-666-8704 (Commercial)
or 1385-99-967-0566 (L47A1)

SPECIFICATION

Disruptor Length 485mm

Main body dia 50mm

Rear body dia 65mm,

Weight 3.5Kg

Holdall: Overall Size 500 X 300 X 200mm

Overall equipment weight 6.5Kg

COMPONENTS

Disruptor Main Body

Disruptor Rear Body
